DataApex

WE BRING YOU **CLARITY** - CHROMATOGRAPHY SOFTWARE
CREATED BY CHROMATOGRAPHY SPECIALISTS

Who we are

DataApex is an independent software company
specializing exclusively in the **development of
chromatography software** and associated hardware.
Since our founding in 1991, we have delivered innovative,
high-performance solutions trusted by laboratories in
over 100 countries.

Our mission

To provide laboratories around the world with reliable,
flexible, and intuitive chromatography software -
developed through **real-world experience**, technical
expertise, and a strong partnership with our users.

Quality commitment

We are **ISO 9001 certified** - a reflection of our strong internal processes for
development, production, support, and quality control.

Our dedication to data integrity, validation protocols (IQ/OQ), and long-term product
stability makes Clarity suitable for even the most demanding laboratory environments.

TÜV SÜD

Our team

DataApex is a Czech-based company with its main office in Prague. Our team consists of talented professionals with backgrounds in science, research, software engineering, and electronics.

Global reach & OEM solutions

Active in **100+ countries.**

Distributed through a trusted network of **resellers and certified distributors.**

We offer flexible OEM software that allows partners to integrate Clarity under their brand. Our team supports fast and customized deployments to suit your needs.

What sets us apart

☑ Sole focus on chromatography

☑ Technical support by real chromatographers

☑ Close cooperation with global manufacturers of chromatography instruments

☑ Continual software development based on customer feedback

Clarity - Advanced Chromatography Software

Our core platform - Clarity is a powerful, modular chromatography data system (CDS) designed for data acquisition, instrument control, and advanced analysis.

Multi-instrument support: control up to 4 independent systems with up to 32 detector signals.

Direct digital acquisition: over 1000 instruments supported via control modules.

Extensions available: PDA · MS · CE · GPC · EA · DHA · NGA · SST and more.

Modular architecture: Add only the extensions and modules you need.

Regulatory compliance: Full support for GLP, GMP, and 21 CFR Part 11.

Integration-ready: Seamless communication with LIMS and other lab software.

Localization: English (default), German, Spanish, French, and Chinese.

Clarity's robust performance, ease of use, and competitive pricing make it a leading choice for pharmaceutical, environmental, academic, petrochemical, and food analysis laboratories.

❝

We listen to our users. Clarity is a result of real collaboration between our team and laboratories worldwide.

- Jan Hrubý, General Manager
